

Mr. Milliken – We just wanted to bring to your attention the excellent response we had to our inquiry regarding an estimate for a Mitsubishi ductless heat pump system. We called Seacoast on a Monday morning and within one hour of discussing it with Blake Peebles, he was in the great room of our post & beam home. He did an expert job of explaining the system and describing how and where it would be installed. His knowledge of the system convinced us to go ahead with the project. His estimate arrived by e-mail the next day and we signed and returned the contract with the deposit. I can say that a competing estimate was not even in the ball park in responsiveness and costs.

John and Jake arrived at the appointed time and worked diligently on installing the system with some very challenging runs of the Freon lines. They were both extremely professional, friendly and efficient. John did a terrific job instructing us in the systems operation. They left the work areas clean and the system is performing in an outstanding fashion to date.

I complement you and your staff for such a professional and pleasant job and will certainly describe our experience to our friends and associates.

Thanks again,
A Satisfied Customer
